

ANASTASI

DEVELOPMENT COMPANY, L.L.C.

Trust. It is the foundation of any relationship between a developer and homebuyers. Since 1962, Anastasi Development Company has been in the business of building homes, and building trust. Along the way, Anastasi has earned the recognition of industry professionals for their innovative, forward-thinking, buyer-first strategies.

Anastasi specializes in bringing California homeowners closer to the things that matter. Through their dynamic infill projects for multi-family, single-family, and senior housing, Anastasi provides buyers with homes in desirable coastal locations at accessible pricing. In the process, they improve neighborhoods by removing blighted structures and replacing them with invigorating new housing.

Anastasi has also established a reputation among Central and Southern California homebuyers for building quality-crafted homes of exceptional value. Their use of traditional upgrade amenities as standard in their homes has raised the bar for new home quality throughout the state.

Homeowners have responded time and again to Anastasi's commitment to quality homebuilding in appealing locales, with more than 3,500 homes built to date and a total sales volume exceeding \$850 million. Anastasi's record speaks for itself—and has only just begun.
